

Emerging Technologies Forum
9 and 10 September 2019
RMIT University – Storey Hall
336–348 Swanston Street, Melbourne, Australia

Digital Transformation in Aerospace

The 2019 Programme Committee meeting of the International Council of the Aeronautical Sciences (ICAS) will be held at RMIT University on 8 – 13 September 2019.

The primary role of the programme committee is to review and select abstracts for presentation at the 32nd Congress of the International Council of the Aeronautical Sciences on 14 – 18 September 2020 in Shanghai, China. For more information on ICAS and its committees I refer you to: www.icas.org

Associated with the ICAS Programme Committee meeting is a 2-day Emerging Technologies Forum (ETF) on a selected theme relevant to aeronautics (www.icas.org/Workshops). This year the selected theme is *Digital Transformation in Aerospace* and will be held on 9 – 10 September 2019.

The theme is divided into 4 topics each covering a half day of presentations and concluded by a panel discussion. The four topics are:

9/9: Morning: Cyber-Physical Systems Afternoon: Digital Twin Concepts
10/9: Morning: Digital Factory Afternoon: Advanced Manufacturing

The Forum aims to include experts from Australia and around the World and is open to the general open.

I like to invite you and your colleagues to contribute to the Forum in one or more of the above topics. If you like to participate, please provide me with name and contact details of the speaker, title of the presentation + summary and the topic the presentation belongs in.

For more information please contact:
